

UF Covid Summary

20 September, 2020

Data Source

The data used to generate these figures were extracted from the UF Covid Dashboard. All code and data can be found at https://github.com/embruna/UF_COVID.

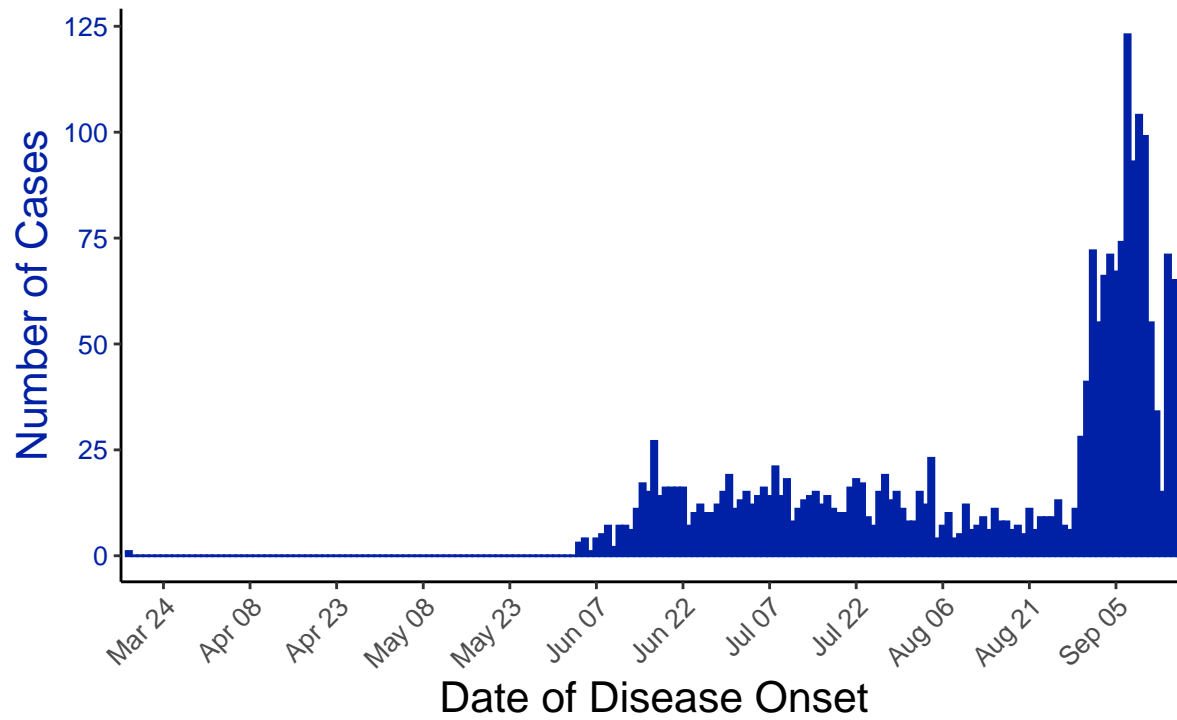

Additional information and Important Caveats

1. UF posts daily data on UF affiliated cases at <http://www.ufl.edu/articles/2020/09/covid-data.html>. A “UF Affiliate” appears to be anyone who has tested positive in Florida that has a UF ID number. They are identified by cross-matching the UF Persons database with the Health Department database. The figures for UF-affiliates therefore include UF affiliates throughout the state, not just those in Alachua County. Additional Details can be found here. The data for a particular day appear to be updated periodically as new information comes in [Thanks to D. Hutchinson for finding these resources].
2. Calculations of tests per day, positives per day, and positivity rate are based on the dates the data were *posted*. It is possible that data released on one day includes tests that were conducted over multiple days.
3. Faculty and staff who have been working remotely must be tested prior to returning to campus (RTC Program). Testing is optional for students. "Mandatory testing may be required for Students working in clinical or research settings involving contact with patients and / or human subjects or Athletes and other groups who cannot reliably either wear a face mask/cloth face covering or physically distance in their day-to-day activities.' source.

DISCLAIMER
